

Grocery Cart Math

by Jaye Hansen

1. List ten items that cost less than \$1.00
2. Write the exact price for each item.

Item	Price	How Many	Total Price
Example: canned tuna	\$.50	3	\$1.50
1.		2	
2.		5	
3.		4	
4.		2	
5.		3	
6.		5	
7.		4	
8.		1	
9.		4	
10.		5	

1. Pretend that you are going to buy more than one package of each item. How much will it cost?
2. Multiply the price by the number in the "How Many" column. Write your answer in the "Total Price" column.
