

## Triple Story Chart

Begin with an 8 1/2" x 11" paper or construction paper. Fold the paper into thirds and crease well.

Open it up and turn the paper over. Measure the length of your index finger and fold that section of the paper up and crease well.

Hold that folded section in your hand and cut the two folds up to the X's. Turn over and set up.

The back three flaps serve as feet to hold the chart up. Pictures or writing can be put onto each section and displayed.
